

Presented by: Francois Louis et Laarabi Suleyman

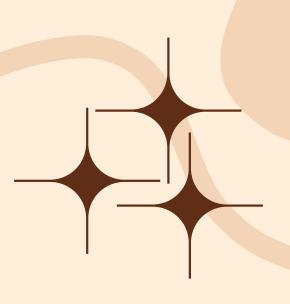

Un Moteur de jeux

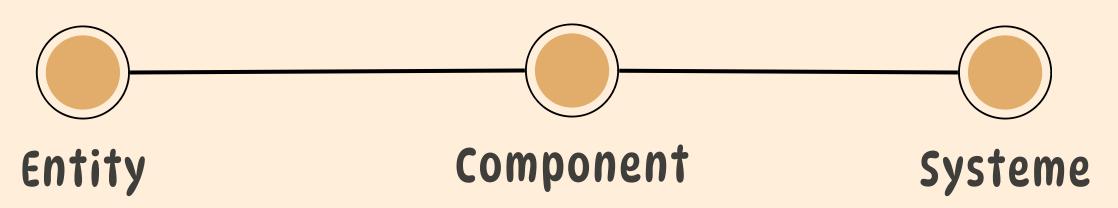

- Simple
- Rapide
- Complet
- Modulaire
- Axé sur les donées

C'EST QUOI ? (Une bande d'oiseau)

AXÉ SUR LES DONNÉES

```
#[derive(Component)]
struct Player;

fn system(
  q: Query<(Entity, &Player)>
) {
}
```

WORKSHOP GOALS

- Comprendre Bevy et sa philosophie (LIRE LE QUICKSTART)
- Construire un Plugin réutilisable dans vos projet avec Bevy
- Aprrendre de nouvelle fonctionnaliter de rust (aux passage)

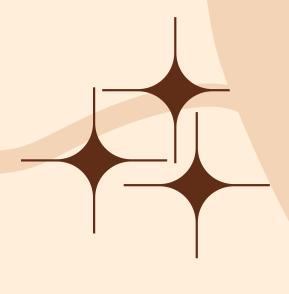

COMMENT APPRENDRE

• Bevy CheatBook: https://bevy-cheatbook.github.io/

• Bevy Example: https://bevyengine.org/examples/

• chrisbiscardi: https://www.youtube.com/@chrisbiscardi

• bevy learn: https://bevyengine.org/learn/

PROPOSITION DE PROJET (PLUGIN D'ANIMATION)

```
pub fn spawn_player(
    mut commands: Commands,
    asset_server: Res<AssetServer>,
    mut texture_layouts: ResMut<Assets<TextureAtlasLayout>>,
) {
    let layout = TextureAtlasLayout::from_grid(UVec2::new(32, 32), 4, 2, None, None);
    commands.spawn((
        Sprite::from_atlas_image(
            asset_server.load("player.png"),
            TextureAtlas {
                layout: texture_layouts.add(layout),
                index: 1,
        SpriteSheetAnimation {
            start: 0,
            end: 4,
            timer: Timer::from_seconds(0.1, TimerMode::Repeating),
    ));
```

https://github.com/suleymanlaarabi/LearnBevy

```
fn main() {
    App::new()
        .add_plugins(SpriteSheetAnimationPlugin)
        .add_systems(Startup, spawn_player)
        .run();
}
```
